

Surface Solutions "Takes the Cake"

When Surface Solutions was approached by an Industrial Bakery to address their flooring needs, Surface Solutions made the flooring installation "As Easy As Pie". Over the past three years, Surface Solutions has transformed for the Industrial Bakery over 200,000SF of new and existing concrete at multiple facilities with a 1/4" UCRETE HP Flooring System. Additionally, Surface Solutions transformed 10,000 SF of old carpet with a 1/8" Selby Flake Flooring System. The Industrial Bakery needed a flooring solution for its production areas which could withstand thermal shock, impact, resistance to slipping but was also easy to clean. Furthermore the Industrial Bakery needed quick turnaround times to minimize downtime on production. Surface Solutions recommended UCRETE HP, a 1/4" urethane concrete resurfacer, consisting of a rapid two step installation for the production areas. UCRETE HP stands up well to rapid hot freeze cycles, impact from steel vats, while maintaining a non-slip, cleanable surface. For the office areas, The Industrial Bakery needed an aesthetically pleasing floor system that is durable, easy to clean, and cost effective. Surface Solutions recommended a Selby Flake Flooring System, a 1/8" epoxy resurfacer, consisting of vinyl flakes for the office areas. Selby Flake Flooring Systems stand up well to office furniture and chairs while maintaining a cleanable surface. Surface Solutions has maintained a three year relationship with the Industrial Bakery through rapid turn-key installations, quality in house installations, and single source five year warranties.

Project Information	
Name of Project:	
System Used:	UCRETE HP
Market Sector:	Bakery
Location:	Indiana
Client:	Harlan
Square Footage:	200,000
Completion Time:	On Going
