

FOOD PROCESSING

INDIANAPOLIS | UCRETE UD 200 & RG

PRODUCT

Indianapolis Fruit

SYSTEM USED

UCRETE UD200 & RG

MARKET SECTOR

Food Processing

LOCATION

Bluffton, IN

SQUARE FEET

15,000 SF

PROJECT TIME

5 Days Per Phase

Surface Solutions was contracted by Pepper Construction to install 15,000 square feet of Ucrete UD200 urethane concrete at Indianapolis Fruit Co. We were able to install the flooring system over 7-day-old concrete.

The concrete was prepped via shot-blasting and the edges and curbs were prepped with hand grinders. Surface Solutions then primed and applied Ucrete RG to the curbs to protect them from impact and thermal cycling. The Ucrete UD200 was applied to the floor and allowed to cure overnight. After the floor and curbs were cured, the joints were cut and filled with sealant. The customer was pleased with the durability of the floor coating and hopes to complete more flooring projects with Surface Solutions in the future.
