

## Kerry Ingredients in Gridley, IL - UCrete HP Installation

Kerry Ingredients needed a solution for a drainage issue at their Gridley, Illinois production facility. Surface Solutions was called upon to correct the slope of the existing flooring and provide a safe and attractive finish that would withstand high traffic and frequent cleaning. Surface Solutions' team of installation experts was able to complete the project in only three days. Using BASF Rapid Mortar 1060, installers were able to direct the slope of the flooring to existing drains throughout the facility. With the concrete surface corrected for proper drainage, all that was needed was a durable coating to complete the 3000 square foot project. Surface Solutions recommended BASF's Ucrete HP urethane concrete resurfacer. BASF's UCrete HP resists damage due to water penetration, chemical solvents, temperature changes and heavy traffic. Surface Solutions exceeded customer expectations with the efficient installation of a quality product.
