

New Flowcrete SLB Flooring for a Commercial Bakery in Chicago

Project Information	
Name of Project:	
System Used:	Flowcrete SLB
Market Sector:	Food & Beverage
Location:	Chicago, Ill.
Client:	Commercial Bakery
Square Footage:	2,000 SF
Completion Time:	

Surface Solutions was recently approached by a commercial bakery on the south side of Chicago who needed help with their floors. The environment at the commercial bakery is very wet and the current epoxy flooring was failing due to all of the moisture. Due to the harsh conditions, we suggested Flowcrete SR flooring. Our crew got to work, removing the 2,000 square feet of epoxy floor and the existing thin mil coatings. Once removed, we put down the Flowcrete SR at ¼" Thickness and Broadcast Sand as well as SS 253 Novolac Coating in gray for chemical resistance. Surface Solutions exceeded the customers' expectations we will be returning at the end of May to complete another flooring project for the Chicago bakery.
